Profile

I have extensive experience in all types of editing platforms and supervisory roles in post production with a vast knowledge of production and technical-savvy. My career has also equipped me with strong relationship skills.

Highly motivated and driven with solid experience managing all levels of large-scale projects for commercials, television series, tv documentaries, film and music videos.

I have always enjoyed and preferred to work with a team and to connect closely and creatively with my Director. Which, is why I prefer to keep a small niche client base, allowing me to work on all of their projects and be a regular part of their team.

I have edited commercials, films, music videos documentaries and series through my own company over the past 10 years ('The House Post Production'). Before that collectively in the film industry for 25 years gaining unrivalled experience in the field.
