

ABOUT ME

I am passionate about creating fun and engaging video content. For the past 8 years I have worked for a variety of clients ranging from household names such as Microsoft and Paypal, to events companies and local businesses. My extensive knowledge and experience of software such as Adobe After Effects, Premiere and Cinema 4D means I can always deliver high quality content.

Currently working as a freelancer, I have recently worked with large event production companies to deliver to their clients, and frequently receive high praise for my work. Building on skills obtained when I worked for a small events production company, I've since won awards for my motion graphics work and short film projects.

SOFTWARE USED

Adobe After Effects CC
Cinema 4D
Autodesk 3D Studio Max 2012
Adobe CC (Illustrator, Photoshop)
