I'm a motivated, creative, award winning graphic designer and compositor, who has worked on projects for leading advertising and broadcast clients, including the BBC, ITV, Channel 4, S4C, Moonpig, Photo Box, Screwfix and Clash of Kings for ELEX Wireless.

I am fortunate enough to have been able to combine my love for design with high end finishing, which includes grading and compositing and finishing title sequences, promotional spots, FX shots and national TV adverts.

## Work

**Head of Post Production**  
Wordley Production  
Penarth, Cardiff  
2010 - 2016

Wordley creates national TV ads and high end corporate videos for clients ranging from Moonpig and Screwfix to Nationwide. As well as leading a team of five as head of post production I was leading online editor working on Autodesk Smoke, Flame and Lustre. Day to day work included conforming, grading, compositing, fixing, finishing, outputting sequences and managing the team. As head of department, I also made decisions on purchasing and upgrading software.

**Creative Compositor**  
Eclipse Creative  
Cardiff  
2000 - 2010

During my decade at Eclipse I utilised Avid DS Nitris and After Effects in the creation of title sequences, promotional spots, VFX shots, plus conference and corporate videos. I was also the lead on bringing in broadcast work and successfully pitched my own ideas and concepts on many occasions.

**Broadcast Designer**  
Agenda TV  
Swansea  
1991 - 2000

I began my career in motion graphics at Agenda TV working on a live, nightly, Welsh language TV programme for S4C. My job was to prep all the graphical elements for each broadcast. I was also tasked with creating title sequences and stings for all of the companys output. As the company grew, I headed up a team of three designers and lead several programme re-brands across television and print.
