PROFILE

I have been an offline/online editor since 2000 using Final Cut Pro and Premiere. During this time I worked on a variety of programme formats including; commercials, short films, feature documentaries and music promos. I enjoy the different challenges that each format brings and adapting accordingly to the needs of each film. I colour grade projects using Da Vinci Resolve and love seeing the footage come to life during this process. I have directed and produced films of my own and I am also able to take the lead on projects overseeing the post production process of a team.
