- **A Levels** Geography (B), Chemistry (C), Applied Science (C)

2006 - 2008 Oathall Community College, West Sussex

- **9 GCSE's** at C and above including Maths and English.

EMPLOYMENT

Sales Assistant/Photo Consultant, Boots Pharmacy

February 2010 - September 2011

- As Sales Assistant I was responsible for serving customers, receiving and putting out delivery, closing and opening the store, cash counting and collections and checking the food fridges are the right temperature and contain no expired foods.
- As Photo Consultant I was responsible for running the photo lab independently, developing negatives, maintaining the printers and helping customers on the digital photo machines.

Marquee Rigger

Summer 2012 & summer 2013

- Worked in a team assembling marquees for private events. Heavy physical labour was involved and required teamwork and coordination to complete safely and efficiently. Had to be very flexible during peak season times and had to work long hours to ensure deadlines were met.

Freelance Video Production

June 2013 - Present

- Create video content for clients. Videos can vary from Promotional to Internal Communications videos. I plan, shoot and edit each product using a variety of programs, including Sony Vegas Pro, Adobe Premier Pro and Adobe After Effects. Familiar with DSLR's and the BMPCC.

- Flexibility and self-motivation is essential to accepting as many opportunities as possible and ensuring the product is finished on time. Regularly present my work on the product as it develops and frequently communicate with the client to ensure the needs of the client are met.
- Showreel at: <https://vimeo.com/151062391>

RELEVANT SKILLS

Communication & Presentation: I am an effective communicator with strong verbal communication which has been demonstrated by listening to customer queries and finding a quick solution. I have had several commendations from customers I have served and earned in-store credit as a reward. As a freelance videographer I have used my communication skills to carefully negotiate with clients, ensuring that both parties are satisfied. I regularly present my work to my clients and have taken part in many group and solo presentations for my degree, all with positive feedback.

Creativity and Drive: Proactively run my own Youtube channel; conceptualising, planning, shooting and editing short films. Motivate others to participate as crew members when shooting. The short films encompass all genres as I like to keep my work diverse. Collaborate with clients to create a joint vision of their product.

Organisation & Flexibility: I have demonstrated excellent organisational skills by meeting all university deadlines alongside my freelance work. Our clients will want to see several edits of the video before the final deadline and so working to a strict personal schedule is essential. Regularly organise and direct a small crew for my short films.

IT & Technical Skills: My degree course has taught me how to effectively use Geographical Information Systems (GIS) to a high standard; achieving a First Class pass for all GIS projects. I am well versed in Microsoft Office programmes, such as Excel, Word, PowerPoint and Publisher, frequently using each of these to complete course-work. I have self-taught knowledge of video editing software including Sony Vegas Pro 13, Adobe Premiere, Adobe After Effects, Mocha AE, DaVinci Resolve and Boujou.

Gap year: During my gap year I worked and saved to travel the east coast of Australia with a friend. We started in Melbourne and made our way up to Port Douglas involving ourselves in the culture and meeting several new friends on the way. We challenged ourselves with extreme sports, two highlights being sky diving and white water rafting. The trip was a success and helped evolve my initiative, self-reliance, communication skills and flexibility.

Additional Information

- Full clean driving licence
- Active member of the gym, committing to training schedules and keeping fit and healthy
- Full showreel videos at: <https://vimeo.com/user24647336/videos>
