Overview

Freelance camera operator based in London and the South East. I have 10 years experience in filmmaking and so have a strong creative eye for the perfect shot and always deliver to the highest standards. I am used to working in all conditions from large scale Live OBs, shooting in foreign locations, studios and covert situations. I'm well practiced in all forms of camera operating including single camera, multi-cam, news gathering, high frame rate, mini-cams, green screens etc. I enjoy it all and make sure this comes across in my work.
