ABOUT

My name is Teja Jereb and I work under my artistic name Teya Teyson. I was born in Ljubljana, Slovenia on 9th of March in 1995.

Since I was 11 years old I was interested in photography and video production. There was always something that fascinated and inspired me when I held the camera in my hands. I always felt joy and happiness. I was always amazed by a huge amount of creativity running through my mind when I started thinking how could I shot things from different angles, make different stories. And so it all began!

In 2012 I got my first big photo projects with *Hairdressing School Ljubljana* at their 50th anniversary where I also collaborated with a fashion designer *Peter Movrin*. This was a break through into the fashion/portrait photography industry.

Till the end of 2014 I was working a lot on various photo projects for different artists, with different companies where I gained even more knowledge and defined my photographic style.

In the same year I also started working in video production which was my first love since I had my first digital camera. I felt that I gained enough knowledge about getting strong emotions and nice lightening in still pictures, that it was time for me to go step forward - to create moving pictures.

In March 2015 I moved to London where I continued working on video projects as a director, editor and videographer.

After 2 months I got a commercial video project for *CHI Drinks London* (*Jonathan Newman, film director*) for which I created the whole commercial video concept from pre-production, production to post-production.

I see each project as a new challenge to create something better and to go step forward, to keep learning. I always strive to put all my creativity in a project and work with passion and open mind!

Personal Characteristics:

- A very self-motivated person with good organising skills and a huge passion to create.
- An artist by heart, always striving to make something remarkable. I can find inspiration in every little thing.
- Great communication skills.
- Professional.
- Perfectionist.
- Very organised.
- Sophisticated when it comes to photography and video production, taking care of all little details.
- Trying to keep things simple but still make them amazing and eye-catching.
- I like to work with people and I love creating projects which leave people speechless.
- In unexpected situations improvisation was always in my favour. If it seems that there is no right way, I will find one!
